Schneider Electric bets \$22.6B on PTC in its biggest deal ever

The French electrification giant pays a 42% premium for US industrial software, and its own shares sink

By **Manasee Kurlekar** | October 6, 2026

Schneider Electric agreed to buy PTC for \$205 per share in cash, valuing its equity at about \$22.6 billion. This move while surprising, reiterated that Schneider wants to own both the hardware and the software behind AI-era factories and data centres.

The deal is expected to close by Q3 2027. The price is a 42.3% premium to PTC's previous close and implies an enterprise value of \$23.7 billion.

Schneider will fund it with €5–6 billion of new shares and €16–17 billion of debt.

PTC stock jumped 36%, while *Schneider fell as much as 9.4% in Paris, its worst day since April.*
